OBJECTIVE

Front End Developer

PROFESSIONAL PROFILE

- At the moment I am transitioning from the financial market to front-end development. I am passionate about creating digital solutions that are beautiful, functional and accessible.
- I study through various means, but currently I am taking the Full-Stack Python Developer course at EBAC, which teaches me the main tools and concepts of web development. I learned to use Git, HTML, CSS, JavaScript, JQuery, responsiveness, Bootstrap, SaSS, Gulp, Grunt, BEM and SMACSS methodology, HTML email construction, Ajax and exceptions, Object Oriented Programming, Typescript, ReactJS, VueJS and Redux. There are many technologies, but I am always willing to learn more and get updated.
- I have already applied my knowledge in several personal projects and projects proposed by the course. I created responsive websites, interactive applications, HTML emails and even a website for a friend. You can see some of my work in my portfolio.
- Before venturing into the world of web development, I worked in the financial market for over 4 years. I worked in areas such as FP&A, Internal Audit and Accounting. These experiences gave me a broad view of business and customer needs. I also developed skills such as data analysis, communication and teamwork.
- I am looking for new challenges and opportunities in the web development area. I want to put into practice everything I have learned and contribute to the success of incredible projects. If you are looking for a dedicated, creative and proactive professional, please contact me.

PROFESSIONAL EXPERIENCE

Jul/2021 – Jul/2022

Fator Bank (Retail Banking)

FP&A Analyst:

- Responsible for creating and analyzing the organization's financial planning, aligned with the long-term strategy and financial market trends.
- Perform economic feasibility studies of projects, considering the risks, costs and benefits involved.
- Monitor and report the organization's financial performance, comparing actual results with goals and forecasts.
- Develop financial models to evaluate the impact of business decisions and advise organization leaders.
- Interact with business areas to understand their demands, provide analytical support and contribute to the organization's growth

Success stories: I used data analysis tools to collect and process information on revenues, costs, profitability and risks. I also created reports and dashboards to present results and

recommendations to managers. With my work, I contributed to increasing operational efficiency, reducing costs and improving bank customer satisfaction.

May/2019 – Aug/2020 Goldman Sachs (Multinational Financial Group)

Internal Audit Intern:

- Translation of audit reports from English to Portuguese and vice versa, ensuring the quality and accuracy of information.
- Execution of audit tests in various areas of the company, verifying compliance with internal and external policies, standards and regulations.
- Presentations to the audit committee, reporting test results, major deficiencies and improvement recommendations.
- Constant monitoring with audited areas, monitoring the status of corrective and preventive actions, as well as new regulatory or internal changes that impact the internal control environment.
- Support in the execution of administrative and financial demands such as control of purchase history, sales and operational expenses, monitoring of results obtained and management of cash flow.

Success stories: I participated in a project that involved reviewing the company's internal controls, identifying risks and opportunities for improvement. The project was a success because it contributed to increasing the efficiency and security of the company's processes, as well as generating savings of resources and time.

Jan/2019 – May/2019 Amazon (Tech Company)

Accounting Intern:

- Analysis and interpretation of financial reports, verifying the consistency and quality of data.
- Daily use of Oracle tools and report extraction to support decision making.
- Direct contact with LATAM partners, clarifying doubts and solving problems.
- Deep understanding of company accounts, monitoring variations and impacts on results.
- Translation of contracts in English and Spanish into Portuguese, ensuring compliance with local regulations.
- Preparation of PowerPoint presentations to report key indicators and recommendations.
- Verification and issuance of invoices, following internal and external procedures.
- Calculation of Transfer Price profits, applying appropriate methodologies.

Success stories: Implementation of a new integrated financial management system. This system allowed for the optimization of accounting processes, cost reduction and increased efficiency and transparency of the company's financial operations. I was responsible for assisting in the migration of data from the old system to the new one, performing quality and validation tests and preparing performance reports and indicators.

Mar/2018 – Nov/2018 Multiplus (Fidelity Company)

Tax Intern:

- Organizing and archiving tax documents in accordance with relevant norms and regulations.
- Researching and reading federal, state and municipal legislation to ensure compliance and accuracy.

- Creating a control spreadsheet to track and monitor tax activities and transactions.
- Preparing technical texts such as statements, simple petitions, responses to notifications and other documents required by authorities.
- Participating in the preparation of feedback, guidance, internal procedures and other guidelines for the tax department.
- Providing tax support to other areas of the company, such as sales, purchasing and compliance, answering questions and resolving any doubts.
- Monitoring administrative process protocols with federal, state and municipal agents and following up on their status and results.
- Reconciling taxes in general and verifying their correctness and consistency.
- Entering MIROS into the system and ensuring its correct registration and processing.

Success cases: implementation of a control and monitoring system for tax obligations that reduced the risks of fines and penalties, as well as optimized the time and resources of the team. This system was developed in partnership with the IT department, and I was responsible for identifying tax needs and requirements and testing functionalities. The result was an increase in the efficiency and quality of tax work, as well as greater integration between the company's areas..
